Your two-factor authentication scratch codes

The following codes can be used in place of TOTP verification codes, for exceptional cases:

- 18799943
- 21669436
- 54008329
- 97724590
- 99922687

You can use each of these only once. To generate a fresh set of scratch codes, disable and re-enable TOTP.

Don't get locked out of your account!

Scratch codes are one-time verification codes you can use if you lose access to your phone / your TOTP app.

We recommend that you print these codes and keep them somewhere safe and accessible (like your wallet).
